

SUPPLEMENTARY

S1

Table S1. *Marked individuals, social status, and sex. Extracted from the monitoring program: Age, pack size, litter size in brackets. PH and DI – philopatric or dispersing offspring. Percentage of marked individuals on minimum total pack size, enlisted on territory year individual ID. FRI is an abbreviation for Finnish/Russian immigrant.*

Territory - Year	Wolf ID	Status	Age	PD	Pack size	% Collared

N = 14 territory years	51 unique individuals		22DI			
			7PH			

* Yearlings M1708 and M1712 kept for capture effect matrices, removed from subsequent analysis (GAMM).

** Collar malfunction (M0801), unknown fate.

*** Collar malfunction (M1706), confirmed philopatric (PH) by DNA.

SUPPLEMENTARY

S2

Table S2. Territory – year overview on territory size (MCP) and acquired number of positions from adult breeders used to construct yearly MCP territories, the obtained 75 inter-quantile distances from all 4-hourly position intervals from the adult breeder movement in a given territory, and the divided 75% distance used as an additional buffer around MCP territories.

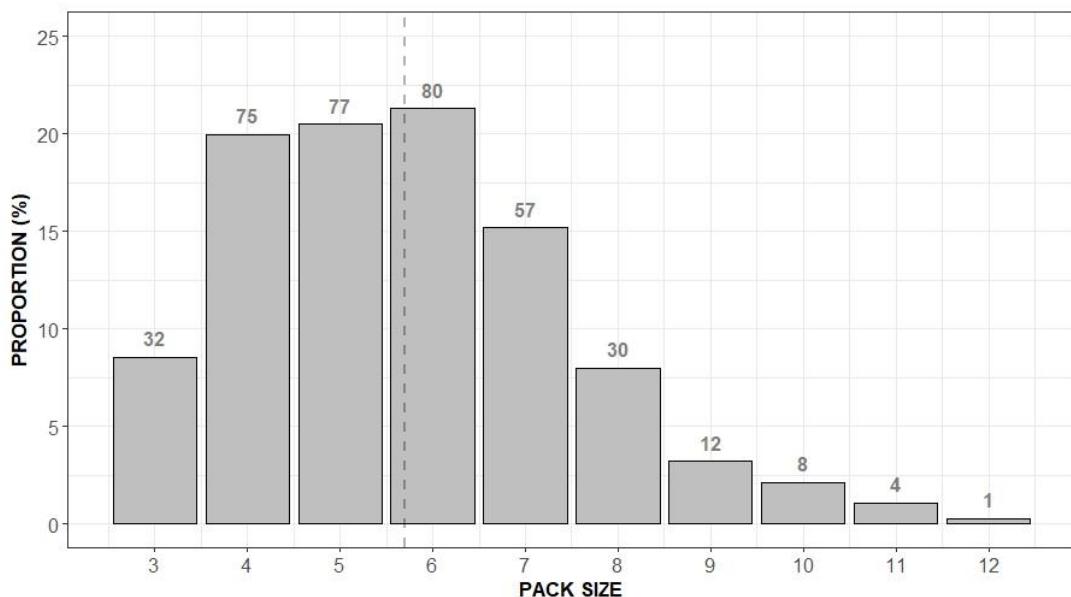

Territory - year	MCP (Km ²)	#positions	75% quantile distances (m)	Divided 75% quantile (m)
Graafjell - 2002/2003	1123.94	5579	4583.75	2291.87
Graafjell - 2003/2004	1129.92	1631	4254.25	2127.12
Gressmark - 2005/2006	1221.89	3144	3480.24	1740.12
Kynna - 2006/2007	414.79	216	3988.19	1994.10

SUPPLEMENTARY

S4

Figure S4. Schematic overview of number of days after capture on individuals in a wolf territory. Number in squares indicates days post capture on each individual from capture event. The bottom line shows the summary matrix for days since capture events to account for all individual captures in territory that territory year. All positions of individuals before day 8 in the bottom line were removed from the analyses (i.e., one week after capture event).

SUPPLEMENTARY

S5

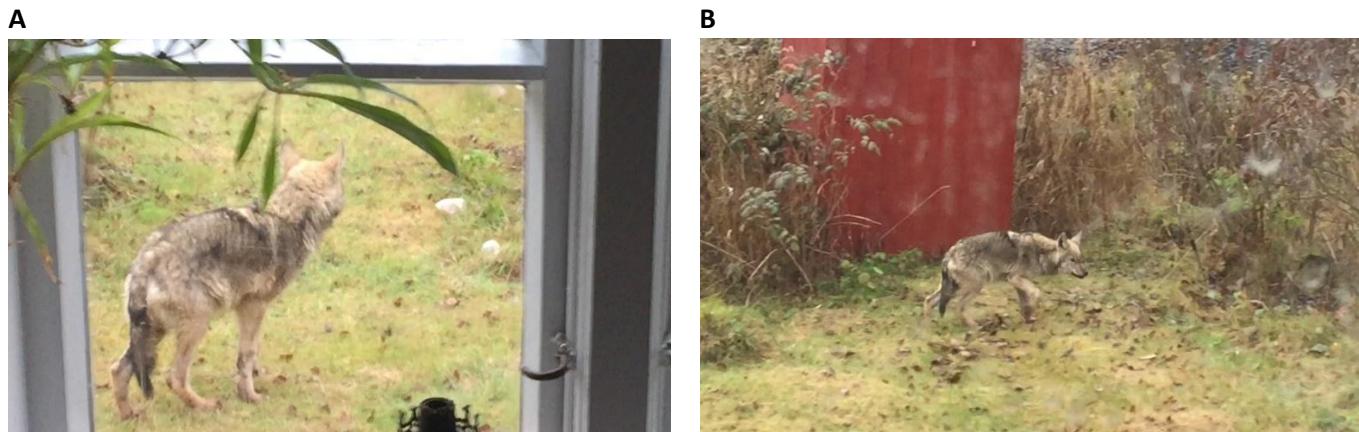

Figure S5 A-B) One of several visits by one out of two wolf pups, confirmed by DNA (V646), from the Julussa territory in the fall 2016 and early winter of 2017. The pups recurrently visited the compost heap and bird feeding station. Pictures are taken with Iphone 6, by the author.
